

Introductory Training for the BIEE-ROSE Project on Energy Efficiency and SDG7 monitoring in Latin America and the Caribbean Virtual conference January 28th 2021

Demonstration of the Energy Efficiency Policy Data Base for LACS

Bruno Lapillonne, Laura Sudries, Enerdata

How to feed the policies data base?

- 1. Before entering new measures in the platform, we suggest you to list the main measures of your country
- Collect all the information needed in a Word document
- 3. Classify the measures

4. Add the measures in the platform

Case study

Title

National Program for Efficient Energy Use.

Law implementing the mandatory energy efficiency labeling for refrigerators and freezers, lamps, air conditioners and electric washing machines

Minimum energy efficiency standard for refrigerators

Plan of replacement of existing lamps with LED for public lighting with subsidies

Energy Efficiency Fund offering loans to finance energy efficiency investments for SME's

Voluntary energy rating of dwellings for their energy efficiency performance

Implementation of projects to raise the efficiency of thermal power plants

Bioenergy strategy

Removal of ownership tax for electric/hybrid vehicles

How to classify the measures?

Demonstration policies & measures data base for LACs

How to classify the measures?

- We need to classify the measures regarding:
 - The sector
 - The type and sub-type
 - The end-use
 - The target
- The classification is important for the users of the public database!
- Case study: try to classify 3 measures for each topic

Title

Please indicate us who will be in charge of the data base in your country at <u>laura.sudries@enerdata.net</u>

Example of measure – Plan of replacement of existing lamps with LED for public lighting with subsidies

• Sector: Services

- **Title**: Plan de recambio de luminarias en alumbrado público
- **Short description :** El Plan Alumbrado Eficiente (PLAE) consiste en el reemplazo de lámparas convencionales en la vía pública por luminarias con tecnología LED a través de fondos no reembolsables del Tesoro Nacional. Este plan, alcanza tanto a municipios como a rutas provinciales.
- **Reference**: <u>http://servicios.infoleg.gob.ar/infolegInternet/anexos/275000-279999/277631/norma.htm</u>

• General description :

Como parte del trabajo previo al lanzamiento del Plan, se realizó de manera conjunta con diferentes entidades y empresas referentes del sector, un Proceso de Consulta la adecuación de las Especificaciones Técnicas de las luminarias. La misma fue aprobada mediante la Disposición E 6-2017 del Ministerio de Energía y Minería, impulsando el reordenamiento del mercado de luminarias LED en conformidad con los estándares de eficiencia, calidad y seguridad establecidos en ellas.

El plan está dirigido a las Provincias y/o Municipios que cumplan con los criterios de selección especificados en la reglamentación del mismo.

Impact evaluation :

El recambio e instalación de luminaria LED por implementación del PLAE, superó en un 14% la cantidad de luminaria que se estimó adquirir de acuerdo a los convenios. De 75.212 unidades estimadas, se adquirieron 86.098 luminarias LED. Esto se logró por una mejora de los precios ofertados en los distintos procesos de compra.

A diciembre de 2018 se ejecutaron en forma completa 65 proyectos de recambio de luminarias de Alumbrado Público, en localidades correspondientes a 17 provincias del país. Los mismos han finalizado con la instalación y los pasos necesarios para obtener el reintegro correspondiente.

Background :

El PLAE reemplaza el Programa Nacional de Uso Racional y Eficiente de la Energía (PRONUREE) vigente anteriormente.

How to use the online policies data base?

Demonstration policies & measures data base for LACs

Examples of use of a EE policy data base

- What policy to address fuel poverty?
- What are the good experiences on enforcing buildings codes ?
- What are the household appliances that are usually labelled?
- Which countries have Minimum Energy Efficiency Standards for households appliances ?
- How to support penetration of efficient refrigerators?
- How to replace wood with modern fuels for cooking?
- How to improve the efficiency of public lighting?
- Which policies to support the diffusion of efficient cars and electric cars
 ?
- How to accelerate the diffusion of solar water heaters?
- What type of measures to promote co-generation and in which industrial sector?
- What type of subsidies schemes to support refurbishment in buildings?
- Is an Energy Saving Obligation schemes useful in the region?

Enerdata

Enerdata is an energy intelligence and consulting company established in 1991. Our experts will help you tackle key energy and climate issues and make sound strategic and business decisions.

We provide research, solutions, consulting and training to key energy players worldwide.
